

Field	Notes
Source	Bachpan Manao
What it is	Child-focused educational initiative
Who it is for	Children and early learning ecosystem
Main idea	Support child-centered learning and development
How it works	Activities, mission-oriented work, and community-facing materials
Evidence	Website and mission pages available
Strength	Child-centered approach
Weakness	Need more clarity on exact FLN relevance
Relevance to us	Possible supporting model for early learning framing
Follow-up needed	Check how directly it connects to FLN

Field	Notes
Source	Annual Status of Education Report
What it is	Large-scale learning assessment report
Who it is for	Researchers, policymakers, education teams
Main idea	Measure actual learning levels of children
How it works	Survey-based assessment of reading and numeracy outcomes
Evidence	Widely cited in FLN discussions
Strength	Strong evidence base and trend visibility

Weakness	Assessment snapshot only, not intervention
Relevance to us	Important benchmark for learning outcomes
Follow-up needed	Study methodology and key FLN indicators

Field	Notes
Source	CBSE FLN resources
What it is	Curriculum and guidance material for FLN
Who it is for	Schools, teachers, students
Main idea	Support FLN learning in early grades
How it works	Structured academic materials and teacher resources
Evidence	Official CBSE FLN resources exist
Strength	Directly linked to school curriculum
Weakness	May be more instructional than adaptive
Relevance to us	Good for syllabus and competency alignment
Follow-up needed	Map our levels against CBSE FLN expectations

Field	Notes
Source	CBSE FLN resources
What it is	Curriculum and guidance material for FLN
Who it is for	Schools, teachers, students
Main idea	Support FLN learning in early grades
How it works	Structured academic materials and teacher resources

Evidence	Official CBSE FLN resources exist
Strength	Directly linked to school curriculum
Weakness	May be more instructional than adaptive
Relevance to us	Good for syllabus and competency alignment
Follow-up needed	Map our levels against CBSE FLN expectations

Field	Notes
Source	UNESCO
What it is	Global education body and policy reference
Who it is for	Policymakers, education systems, schools
Main idea	Improve education outcomes and foundational learning
How it works	Frameworks, reports, guidance, and policy support
Evidence	Mentioned as having used/adopted TaRL-like ideas
Strength	Credibility and international reach
Weakness	Broad policy level, not always classroom-specific
Relevance to us	Useful for global validation of FLN approaches
Follow-up needed	Find exact FLN-related guidance or case studies

Field	Notes
Source	Infosys Foundation / education initiatives
What it is	CSR-linked education programs

Who it is for	Students, schools, communities
Main idea	Support education through multiple initiatives
How it works	Program-based support, education-related interventions
Evidence	Found in search results as education initiatives
Strength	Resources and institutional backing
Weakness	Some initiatives may appear more CSR/PR-oriented than reform-driven
Relevance to us	Comparison point for institutional FLN efforts
Follow-up needed	Check which programs are directly FLN-related

Field	Notes
Source	EkStep Foundation
What it is	Education-focused foundation working on FLN
Who it is for	Children, teachers, systems, education ecosystem
Main idea	Solve foundational learning at scale through open digital public goods
How it works	Builds scalable digital infrastructure and supports FLN-related initiatives
Evidence	Mentioned as a major FLN-focused effort linked to Nandan Nilekani
Strength	Systems-level thinking and scale orientation
Weakness	Some programs may feel indirect or too broad
Relevance to us	Important ecosystem and philosophy reference

Follow-up needed	Identify which EkStep programs connect directly to FLN
------------------	--

Field	Notes
Source	Mindspark Vernacular – Personalised Adaptive Learning
What it is	Adaptive learning platform
Who it is for	Students, likely school-age learners
Main idea	Personalize learning based on learner performance
How it works	Online platform with level-based practice and progression
Evidence	Website-based product; full details were limited because of paywall
Strength	Strong adaptive learning concept
Weakness	Expensive / paywalled; hard to inspect fully
Relevance to us	Useful benchmark for assessment and personalization
Follow-up needed	Compare product flow, access model, and assessment depth

Field	Notes
Source	Pratham, Teaching at the Right Level
What it is	Level-based learning and remediation approach
Who it is for	Children who are below grade level
Main idea	Teach based on current skill level, not class only

How it works	Assess children, group by level, use simple activities and exercises
Evidence	Used in India and referenced by UNESCO and others
Strength	Very practical, simple, and effective for learning gaps
Weakness	Scaling and classroom integration are challenging
Relevance to us	Strong model for level-based assessment and grouping
Follow-up needed	Check exact assessment and remediation design

Field	Notes
Source	NIPUN Bharat Mission
What it is	National mission for foundational literacy and numeracy
Who it is for	Early-grade children, teachers, schools
Main idea	Ensure basic reading and numeracy by Class 3
How it works	Set learning goals, track progress, support FLN improvement
Evidence	Official national mission under India's education framework
Strength	Clear national mandate and broad reach
Weakness	Implementation can vary across states and schools
Relevance to us	Baseline policy reference for FLN work
Follow-up needed	Study goals, monitoring, and classroom rollout
